

SHIP SMARTER AND SAVE

## ITS BASEBALL SEASON

As we get ready for the launch of the 2014 National past time – Baseball – we step up to the plate to help our clients score big savings from the services we provide.

**Single** - For over five decades Data2Logistics and its predecessor companies have been viewed as a freight audit and payment company. But just as the challenges that our clients face have changed so have we. Today we are the single source for the processing and most importantly actionable information for all modes of transportation (Parcel, Truck, Rail, Ocean, Heavy-Weight Air).

**Double** - Most clients expect a firm such as ours to audit their bills for compliance with their contracts. But our audit services have a double purpose. In addition to identifying billing errors, we work with your carriers to help them root cause repetitive errors. By working with your carriers to present the bill right the first time we create efficiencies for all parties.

**Triple** - We live in a global economy. If you are not getting global information, you can triple the benefits you receive from our services by having us process your shipments for three major geographic areas, EMEA, CALA and APAC in addition to those for North America.

**Home Run** - As the staffs in our client's organizations have been shrinking and the expertise to support the analysis of data, markets, and trends is diminishing, we are here to help. Our Professional Services team with over 100 years of real world transportation expertise can provide analysis and support. We can provide a Benchmarking study of your position the marketplace; prepare RFPs, analyze carrier responses and guide negotiations. To learn more about how we can help you hit the ball out of the park and find maximum savings, contact our Professional Service Group.

*These professionals stand ready to support you in controlling your transportation expenses and freight cost analysis. Please contact Leif Holm-Andersen, Executive Director of Professional Services at [Leif.holm-andersen@data2logistics.com](mailto:Leif.holm-andersen@data2logistics.com) or +1 239 425 8050.*
